QUALITY**

Turkish Technology **IN ENERGY MANAGEMENT**

An aerial photograph of a vast, lush green forested valley. The terrain is characterized by rolling hills and deep valleys, all covered in dense, vibrant green trees. The perspective is from a high vantage point, looking down into the valley. The sky above is a clear, bright blue, with a few wispy white clouds scattered across it. The overall scene conveys a sense of natural beauty and environmental health.

“Everyone talks about climate protection and sustainable energy, chasing one goal after another. But the real challenge is to make progress and turn ideas into action. Discover the opportunities made possible with Green technologies.”

Target for a Sustainable Future: **ZERO EMISSIONS**

The world we live in is undergoing rapid transformation. From industrialization to urbanization and digitalization, we must find a way to successfully manage the growing pressures placed on our planet.

At Green, our mission is to shape the future of secure, smart, and sustainable energy management—from industry and buildings to infrastructure and transportation. Our vision is to achieve a zero-emission reality not only for the future, but for today as well.

That's why we are proud to share our "Target: Zero Emission" vision, a real-life example of how the digital energy transition can be successfully achieved in a sustainable way.

Who Are We?

Since 2007, as Green Holding, we have been leading the sector with our innovative solutions and comprehensive range of services. Our operations continue with our headquarters, R&D center, and advanced technology software center, focusing on energy, electricity, construction and mechanical contracting, lighting, vehicle rental, electric vehicle charging stations, electric vehicle leasing, technology, software, cybersecurity, defense, and medical fields.

By following technological innovations and developments worldwide, we bring the projects we realize together with our business partners. Thanks to our strong reference portfolio and comprehensive product range, we maintain our leadership position in the industry and continue to provide the best service to our customers. We embrace the principle of producing value-adding solutions; our broad range of services, from the design to the production and operation of electrical and electronic systems, guides global changes in the sector.

We place great importance on our future investments and R&D efforts, continuously seeking new technologies and solutions beyond what exists today. With our strong reference portfolio and wide product range, we always stay one step ahead with our customers, offering a customer-centric approach supported by high technical capacity and skilled personnel.

FOTEC

Clean Energy Seamless Power

As Fotec, we develop next-generation charging technologies powered by solar energy for electric vehicles. With smart energy management systems, we provide energy infrastructure solutions for modern cities, advanced industrial complexes, urban use, intercity stations, and personal applications. From energy production to distribution, we serve our customers with the technologies we have developed.

With our slogan “Clean Energy, Seamless Power,” we contribute to the global goal of zero emissions and launch technologies within this scope. In this way, we support the creation of a more efficient, intelligent, reliable, environmentally friendly, and emission-free future accessible to everyone. For maximum functionality, we prioritize artificial intelligence integration in all our products and systems, offering tomorrow’s technologies today.

Our founding purpose is to develop charging technologies for next-generation electric vehicles and to provide energy infrastructure to modern cities through smart energy management systems. From electric vehicle charging systems to industrial solutions, from energy transmission and distribution to energy storage, and battery production to solar energy systems, we continue our operations with a wide range of solutions and product offerings—contributing to a sustainable life.

UNIVERSAL VALUES AND BUSINESS APPROACH

At Fotec, our business approach is rooted in universal human values. Love, respect, tolerance, community spirit, friendship, and solidarity are fundamental values reflected in our business. These values are not only expressed verbally but are also internalized and implemented with a deep sense of responsibility in both life and work.

Unleashing Talents

Revealing the talents and energies of our employees to create high-quality work is one of our top priorities. We are aware that each individual contributes unique value and plays a vital role in the bigger picture.

Individual and Collective Success: The Key to Happiness

We recognize that individual success contributes to collective achievement and overall happiness. We place great importance on coordination between team members and encourage collaboration. By embracing diverse ideas, we aim to achieve success through innovative teamwork.

The Outcome of Our Values: Customer Satisfaction

We strive to offer the best service and believe that customer satisfaction stems from the values embedded in our business philosophy. We always prioritize the needs and expectations of our customers, aiming to serve them at the highest level.

The Path to Success

Before we put on our work uniforms, our tasks are already planned and envisioned. We know that well-planned work and thoughtful decision-making lead to meaningful outcomes. Ensuring continuity and completing what we start is a core value we uphold.

Taking a Step Toward the Future with Fotec Values

At Fotec, we believe that by advancing in the light of these values, we will continue to offer the best to both our employees and our customers. Our values will continue to shape our vision and mission for the future.

AI Software

in FOTEC Electric Vehicle Charging Stations

Fotec electric vehicle charging devices represent the latest generation of cutting-edge technology. Our software solutions FOTEC Core, FOTEC Multy EV, FOTEC Changer Scada, FOTEC Driver, and FOTEC Driver Plus combine all data streams and enable you to personalize features such as modularity, ease of use, mobility and advanced functionality.

VISIO SERIES

Eco-Friendly Technology & Sustainability

With environmentally conscious production processes and energy-efficient products, we are building a sustainable future. We use cutting-edge technologies to reduce your carbon footprint.

Reliable Service

We prioritize customer satisfaction with a service network that quickly responds to all technical support and maintenance needs. Our expert team is always by your side.

Modern and Elegant Design

Our products combine modern aesthetics with functionality. Their sleek and stylish design complements every environment and appeals to your sense of style.

Easy Installation

Our products offer simple and quick installation features. With a user-friendly interface, they are easy for everyone to use.

Lifetime Savings

Our high-efficiency technology minimizes energy consumption and ensures long-term savings. This helps protect both your wallet and the environment.

100% Local Production

We proudly manufacture locally, contributing to our national economy. Experience the quality of local engineering and craftsmanship in our products.

Harsh Environmental Conditions

Our products deliver top performance even in extreme weather and environmental conditions. Their durable structure ensures long-lasting use.

Space Efficiency

Thanks to their compact and ergonomic design, our products provide maximum efficiency while occupying minimal space. They can be used comfortably even in small areas.

Eco-Friendly Technology and Sustainability

Through environmentally conscious production processes and energy-efficient products, we are building a sustainable future. We use the latest technologies to reduce your carbon footprint.

100% Local Production

We proudly manufacture locally, contributing to our country's economy. Experience the engineering and craftsmanship quality in our domestically produced products.

Reliable Service

Our service network, which prioritizes customer satisfaction, responds quickly to all technical support and maintenance needs. Our expert team is always by your side.

Resistant to Harsh Conditions

Our products deliver outstanding performance even in extreme weather and environmental conditions. Their durable structure ensures long-lasting use.

Modern and Elegant Design

Our products combine modern aesthetics with functionality, making them suitable for any space. With our elegant and stylish designs, we appeal to your sense of taste.

Space-Saving

Our compact and ergonomic designs offer maximum efficiency while occupying minimal space. They are easily usable even in tight spaces.

Easy Installation

Our products offer time savings with simple and fast installation features. Thanks to our user-friendly interface, anyone can use them with ease.

Our service network, which prioritizes customer satisfaction, responds quickly to all technical support and maintenance needs. Our expert team is always by your side.

Resistant to Harsh Conditions

Our products deliver outstanding performance even in extreme weather and environmental conditions. Their durable structure ensures long-lasting use.

Modern and Elegant Design

Our products combine modern aesthetics with functionality, making them suitable for any space. With our elegant and stylish designs, we appeal to your sense of taste.

Space-Saving

Our compact and ergonomic designs offer maximum efficiency while occupying minimal space. They are easily usable even in tight spaces.

Easy Installation

Our products offer time savings with simple and fast installation features. Thanks to our user-friendly interface, anyone can use them with ease.

We proudly manufacture locally, contributing to our country's economy. Experience the engineering and craftsmanship quality in our domestically produced products.

Reliable Service

Our service network, which prioritizes customer satisfaction, responds quickly to all technical support and maintenance needs. Our expert team is always by your side.

Resistant to Harsh Conditions

Our products deliver outstanding performance even in extreme weather and environmental conditions. Their durable structure ensures long-lasting use.

Modern and Elegant Design

Our products combine modern aesthetics with functionality, making them suitable for any space. With our elegant and stylish designs, we appeal to your sense of taste.

Space-Saving

Our compact and ergonomic designs offer maximum efficiency while occupying minimal space. They are easily usable even in tight spaces.

Easy Installation

Our products offer time savings with simple and fast installation features. Thanks to our user-friendly interface, anyone can use them with ease.

Lifetime Savings

Our high-efficiency technology minimizes energy consumption and ensures long-term savings. This way, it protects both your wallet and the environment.

Eco-Friendly Technology and Sustainability

Through environmentally conscious production processes and energy-efficient products, we are building a sustainable future. We use the latest technologies to reduce your carbon footprint.

100% Local Production

We proudly manufacture locally, contributing to our country's economy. Experience the engineering and craftsmanship quality in our domestically produced products.

Reliable Service

Our service network, which prioritizes customer satisfaction, responds quickly to all technical support and maintenance needs. Our expert team is always by your side.

Resistant to Harsh Conditions

Our products deliver outstanding performance even in extreme weather and environmental conditions. Their durable structure ensures long-lasting use.

Modern and Elegant Design

Our products combine modern aesthetics with functionality, making them suitable for any space. With our elegant and stylish designs, we appeal to your sense of taste.

Space-Saving

Our compact and ergonomic designs offer maximum efficiency while occupying minimal space. They are easily usable even in tight spaces.

Easy Installation

Our products offer time savings with simple and fast installation features. Thanks to our user-friendly interface, anyone can use them with ease.
